

Gelivable[®]

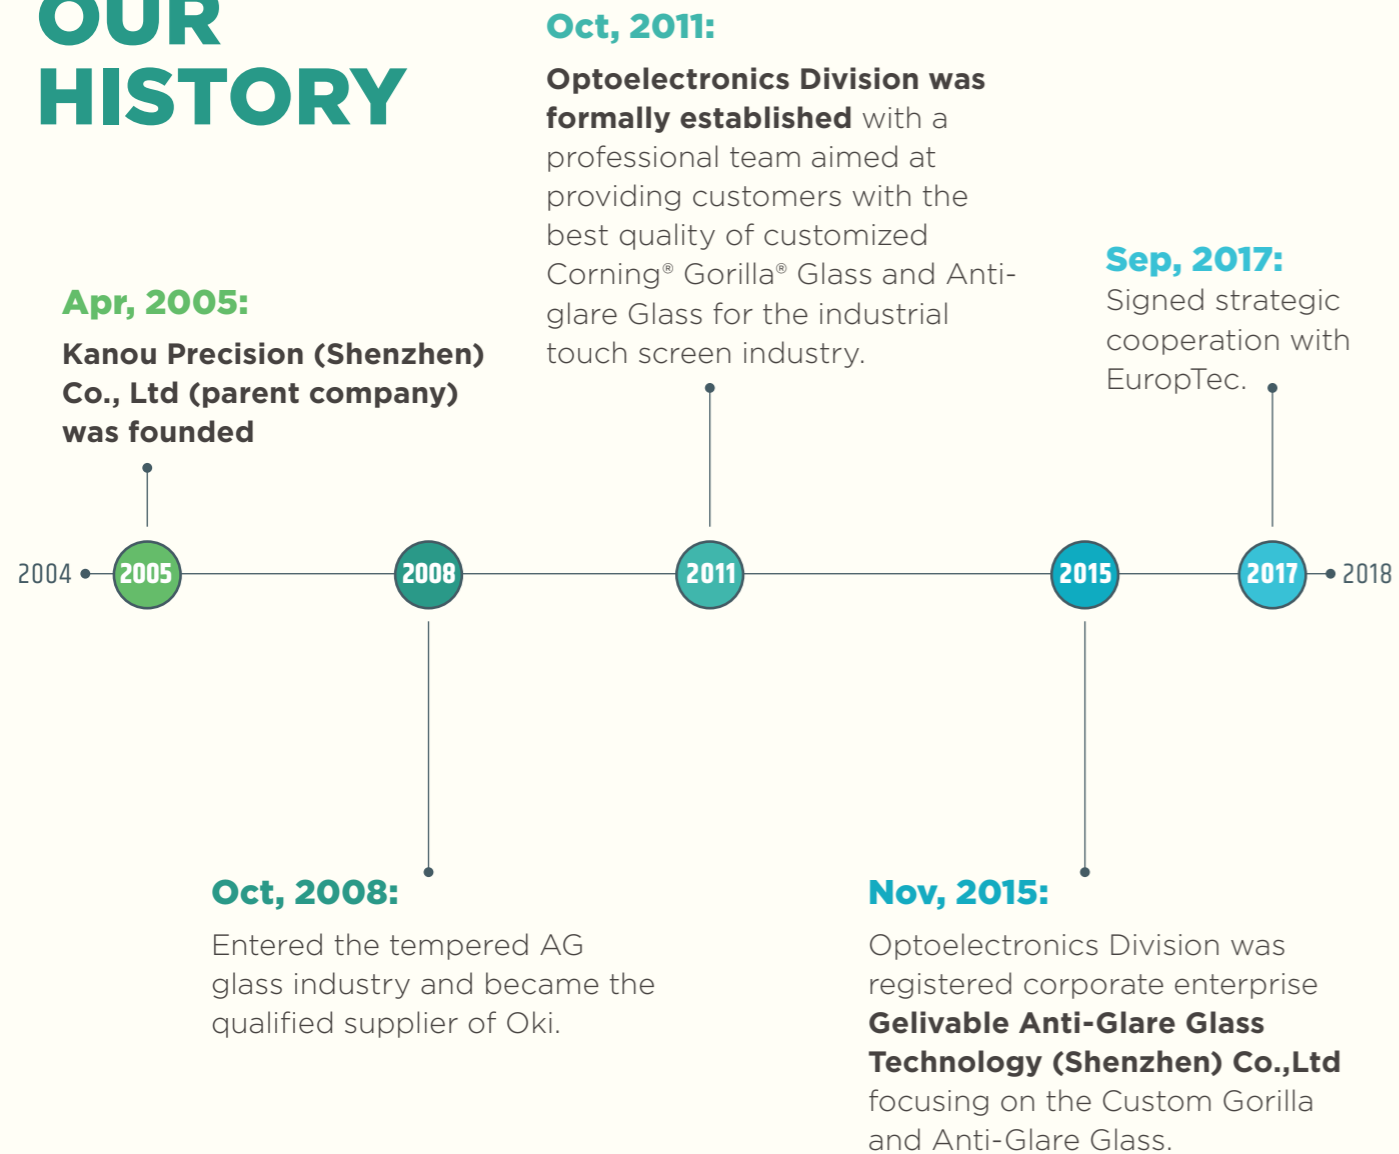

Gelivable

**Anti-Glare Glass
Technology
(Shenzhen) Co.,Ltd**

INTRODUCTION

Gelivable Anti-Glare Glass Technology (Shenzhen) Co.,Ltd (Gelivable Glass) is a leading professional gorilla glass and etching anti-glare glass provider based in Shenzhen City, China and specializing in providing solutions of custom tempered gorilla® glass and anti-glare glass to the industrial touch panel industry.

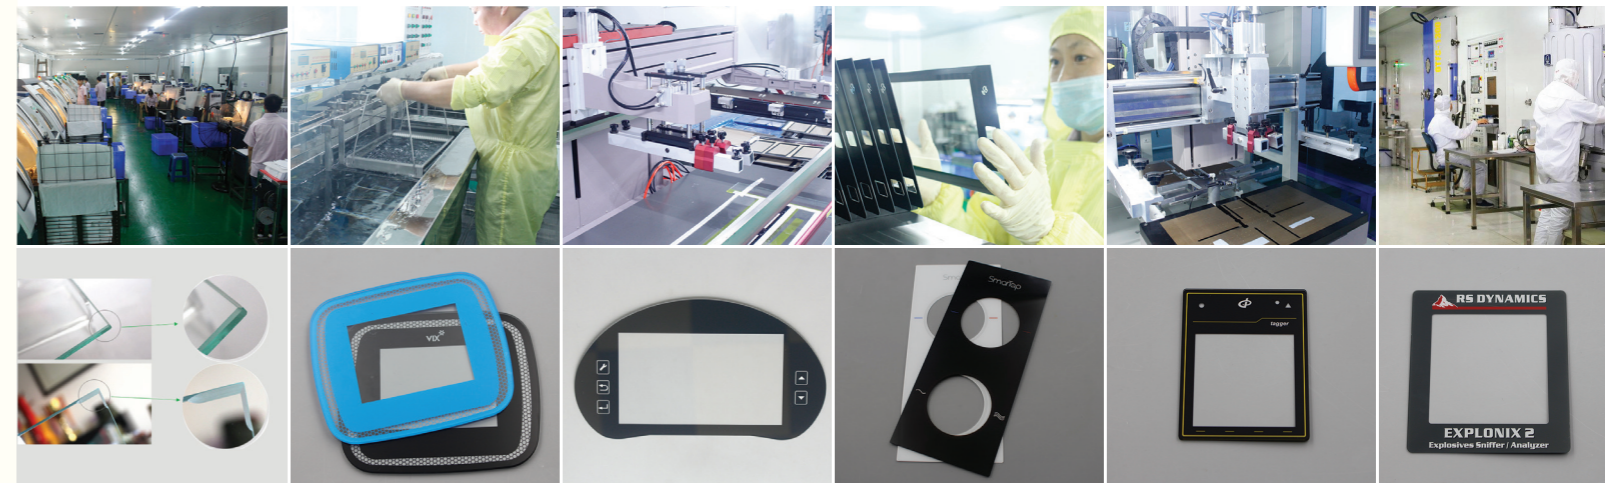

OUR HISTORY

WHO WE ARE

Gelivable Anti-Glare Glass Technology (Shenzhen) Co.,Ltd is your first-choice gorilla glass and anti-glare glass provider with over ten years' experience in the meticulous and precise design and manufacture of glass based on customer requirements using world-class instrumentation and machinery, as well as cutting-edge technology.

Our team, led by our award-winning Manager, Musk Lyu, is made up of over 20 well-trained technicians, engineers and other professionals with numerous years of combined experience in the manufacturing industry. Our staff is efficiently divided into different departments that include Sales, Procurement, Engineering, Quality Control, etc.

OUR MANAGEMENT PHILOSOPHY

OUR MISSION

is to reduce the reflective screen to zero.

OUR VISION

is dedicated to being the world-leading solutions provider of anti-glare glass

OUR GUIDELINE

is to do the utmost best to change the impossible to possible, and we go to whatever length it takes to ensure that we deliver and satisfy our clients.

WHAT WE DO

Gelivable Anti-Glare Glass Technology (Shenzhen) Co.,Ltd is a professional supplier of a wide variety of glass brands at very competitive prices that includes Corning® gorilla® glass, Gelivable® AG glass, AR glass, AF glass, soda lime glass, aluminosilicate glass, and low iron glass.

ANTI-GLARE GLASS FABRICATION

The anti-glare glass is divided into three different types according to the different process: Etching anti-glare glass, Spraying anti-glare glass, and anti-glare coating glass. However, Gelivable chooses to use chemically etched AG glass because it can withstand sand, acid rain and abrasion, making it perfect for the outdoor industrial industry, whose working environment is rugged.

Gelivable® is the leading brand of anti-glare glass for industrial touch screen products. We request Europtec to process the glass sheet with the most advanced etching technology and automatic production line. We then carry out the glass processing in our factory in China. We are dedicated to providing top quality etching anti-glare cover glass for high-end industrial touch screen monitors to improve the end client users' experience.

-  **Better resolution & less eye strain**
-  **Durable and can withstand salt, acid, sand, and rain exposure**
-  **Paper-touch**
-  **Never Peels Off**

APPLICATION

	ATMs
	Military Devices
	Environmental Testing Devices
	Agricultural Equipment
	POS System

GORILLA® GLASS PROCESSING

Corning® Gorilla® Glass is a brand of specialized toughened glass designed to be thin (0.4-2mm), light and damage-resistant. The glass gains its surface strength and crack-resistance from being chemically strengthened. Specialized surface treatments **enhance scratch resistance and outstanding optical clarity.** Gorilla® Glass is an ideal cover sheet for touch screens.

-  **Superior surface quality**
-  **Enhanced retained strength after use**
-  **Improved drop performance**
-  **High resistance to scratch and sharp contact damage**
-  **Accept small quantity (1000pcs)**
-  **Any customized shape**
-  **2.0mm thickness can be provided**

APPLICATION

	Wearable Device
	Smart Home Device
	Digital Shower
	Camera Lens
	Medical Equipment

PROCESSING CAPABILITY LIST

Material	Thickness	Dimension	Shape	CNC Machining	Chemically Strengthened	Heat Tempered	Silk-screen Printing	Anti-fingerprint Coating	Anti-reflective Coating	DLC Coating	3M Double-sided Adhesive	Heat-insulating Film
Corning® Gorilla® Glass 3,4,5	0.4mm, 0.5mm, 0.55mm, 0.7mm, 1.0mm, 1.1mm, 1.5mm, 2.0mm	1"to 32"	Round Square Rectangle Curve	Smooth edges & corner, Tolerance: Min.±0.05mm	CS>650MPa, DOL>40um		Seiko,Teikoku, Dubuit, etc (ROHS & REACH, UV curable ink)	Water contact angle>105°	Single side AR-T>94% Double side AR T>98%	Surface Hardness: 9H,scratch-resistance performance +80	0.11mm-0.64mm, Customized	3MCR70
Gelivable® USA Etched AG glass	0.7mm,1.1mm,1.6mm, 2.0mm,3.0mm,4.0mm,				CS>450MPa, DOL>8um	T≥3mm, Fragment >50pcs within area of 50x50mm. Drop ball test standard depends on the product's thickness and dimension.	6 layers of printing	Water contact angle>100°	Single side AR-T>94% Double side AR T>96%	Surface Hardness: 9H,scratch-resistance performance +60		

WHY CHOOSE US?

“Growth is never by mere chance; it is the result of forces working together.”
- James Cash Penney.

We at Gelivable Anti-Glare Glass Technology (Shenzhen) Co.,Ltd recognize the importance of the success of our esteemed clients in the growth of our business, which is why we always strive to offer them best. We do not just want to increase our sales; we want to support our client's businesses to sell more.

Gelivable Glass is a professional glass supplier that has worked with and satisfied numerous top organizations' products include Toshiba, Oki, Minato, SmarTap, Enovation, Barco, Gyenno, Daikin, Semicom, Kohler, Tel-Tru, Honda (American), Pebble. We offered them our guaranty of quality, they trusted us to deliver, and we duly delivered.

QUALITY

- Firmly execute the **ISO9001-2015** quality management system certified by BSI
- 100%** full inspection for product appearance and AQL **0.25** sampling standard for dimensions on all of our products
- Zero major quality accident in 10 years
- Latest instruments and equipment, Surface stress tester, Gloss meter, Spectrum Tester, Video measuring tester, Drop ball tester, Accelerated weathering tester, colorimeter
- Professional QC team with over **10's** years experience by Japanese management system

SOLUTIONS PROPOSAL

- Professional technical team with over **10's** years experience by Japanese management system
- Actively cooperate with you to meet the functional requirements
- Examples: UV ink pass **1000hrs** UV test, IR ink (customized transmittance to achieve the whole black effect), removable ink, 3M double-sided adhesive, Heat-insulation film, AB glue and holes-min.0.8mm, etc.
- Positive cooperation to develop new technology, such as: process milling surface, Laser engraving to do precise design, multiple and complex printing design
- Help over **100** companies to make complicated prototypes into mass production successfully
- Provide cost-down solutions for more than **100** companies with success

DELIVERY TIME

- Challenge the **100%** on time delivery goal
- 10-15** days delivery time
- Safe stock management system of commonly used materials
- ERP system to control the lead time
- Reliable, safe, trusted and on time delivery logistic company DHL/FEDEX etc.

SERVICE

- Accept small quantity (**1000pcs**)
- Free standard samples
- Safety package, thicker wooden case (width>**25mm**)
- Help to complete and finalize drawings
- Provide free solutions according to different application

CLIENT TESTIMONIALS

We take great pride in the opinions and feedback of clients and we could wish for no further endorsement. Here are some of what a few of our clients had to say.

“For some years now, we have been working with Kanou with (Gelivable), and I must say from the beginning, communication has very fluid. The work was done during the agreed time, and the product was adapted to our needs.”

- Mr.Bernat (Robot, S.A.)

“Very impressed with the exceptional service offered by Penny and the staff at Gelivable Glass. Quality is excellent, and deliveries are always on time. Easily the best China-based supplier we work with.”

- Mr.Allan Bowes (INSOTEC PTY LTD ATFT BOWES TRADING)

CONTACT US

For more information on our company and products, please get in touch with us through any of our contact channels listed below. We are offering free samples of our gorilla glass and anti-glare glass, and it would take less than a day for you to get them. Contact us NOW!
